PREFACE

So many Tutors for Banjo already exist that a new treatise on the subject seems to call for some explanation. The present tutor is the outcome of much careful thought and is the result of many years' experience of teaching by the Author and the justification for its appearance is based on the plea that up to now no tutor has been published which is of real assistance to the advanced student who must have realized that the practice of difficult solos alone will not advance his execution in the same way as suitable exercises. It must be fully realized that execution is only a means to an end and can only justify itself when so employed; it assists us to play difficult passages with ease. The Author has therefore selected those exercises which, in the course of his experience as a teacher, have proved most beneficial.

From the foregoing it must not be thought that this tutor is for advanced students only. A glance through its pages will show that the first few exercises are of a simple character and that the tutor has been graded to lead the student gradually, to those exercises which will be found most beneficial for the playing of more difficult solos.

All extraneous matter has been excluded and the scales and exercises are written in the keys most generally used in Banjo music but some keys have been employed which are not often used on the banjo in order to interest the student who wishes to go further into the matter.

Although the Author invariably uses the thumb and first finger of the right hand on the 1st, 2nd, 3rd and 4th strings for rapid passages requiring double-fingering it will be noted that some of the exercises have been fingered so that they can be adapted for the use of the first and second fingers of the right hand on the 1st string if the student desires to employ that method of double-fingering. Both methods of double-fingering have not been completed for all exercises but the student will readily see how easily he can adapt one style of double-fingering from the other if he will study those passages and exercises which have been fingered for both styles. The Author has thought it better to give only a few illustrations which clearly show this adaptation of both styles of double-fingering and to let the student adapt the remaining exercises himself (if he desires to employ the first and second finger of the right hand for double-fingering on the 1st string) well knowing that the keen student will learn more this way than if everything was meticulously worked out for him and in addition he will then find that there are certain instances and brief passages where one *must* employ either one method *or* the other and where it is impracticable to use both methods.

General Notes and Explanations

Left hand fingering is written above or immediately at the side of the notes. Right hand fingering is written underneath the notes.

In left hand fingering o denotes *open string;* **1, 2, 3** *etc.* denotes the finger to be used for stopping the note in question.

In right hand fingering + denotes *thumb;* · denotes *first finger;* ·· denotes *second finger* and ··· denotes *third finger.*

A number appearing in a circle thus ① placed underneath a note denotes the string upon which the note is to be played and is only used in exceptional cases.

A number appearing underneath a note thus **8** but not enclosed in a circle, denotes the fret to be used and is really placed here to assist the student to find the note quickly (each note under the circumstances being usually during a Position or Position Barré but which note is not actually in the Position or Position Barré indicated.) This likewise is only used in exceptional cases.

When the following sign appears between left hand fingering thus 
the same finger of the left hand must be used for all three notes by sliding up to the top note and back again without lifting the finger off the finger-board, striking all three notes with the right hand in the usual way.

When the following sign appears between the right hand fingering thus 
the note which has the right hand fingering underneath is struck as usual and the finger of the left hand must slide up to the following note which must *not* be struck. If it is intended that the note at the end of the slide should be struck it would be marked with the right hand fingering as is done with the note at the commencement of the slide. When playing a slide where the note at the end of the slide is *not* to be struck, care must be taken to finish the slide so that the second note (at the end of the slide) sounds at precisely the time the note would be struck if it were marked with the right hand fingering underneath. The slide must always be perfectly smooth.

The above sign also appears when the right hand thumb *glides* from the fourth to the third string but in this case the left hand fingering of the second note will show that this note is played on the third string as a different finger of the left hand will be used for the third string note whereas in the *slide* the same finger of the left hand will stop the note at the end of the slide.

When the sign $\frac{\cdot\cdot}{+}$ appears underneath a chord the chord must be *'pinched'* that is the 1st and 2nd strings are played by gliding the first finger of the right hand from the 1st to the 2nd string to meet the thumb which has been used to play the 3rd string. This method will be found to give a very bright tone.

Where the fingering has not been completed the Student will understand that the same fingering is to be carried out for the remainder of the exercise.

———+———

PART I

1. The Notes in music are written on and between lines called a Stave and named after the first seven letters of the Alphabet:— **A B C D E F G.**

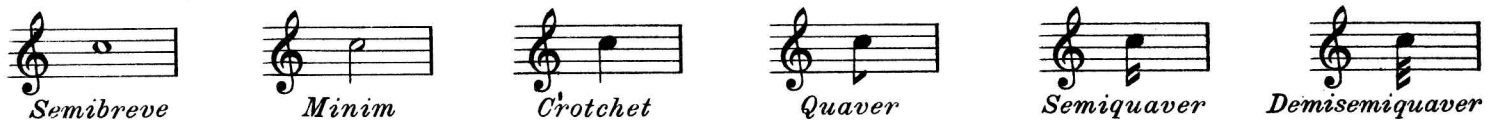
Names of notes on lines of stave are 
notes in the spaces

above and below the stave

2. Other notes are written by drawing short lines above and below the stave and are termed Ledger lines.

Thus:- 
3. All music written for the banjo is in the Treble Clef which is denoted by the following sign

4. There are six kinds of notes in general use in banjo notation, each having a name and shape which indicates its value or duration of sound.



5. The following will explain their relative values

A Semibreve

is equal to

Two Minims

or

Four Crotchets

or

Eight Quavers

or

Sixteen Semiquavers

or

Thirty-two Demisemiquavers

6. When two or more quavers, semiquavers or demisemiquavers are written consecutively, they are sometimes joined together

Thus:-

DOTTED NOTES

7. A dot placed after a note makes it *half* as long again

is equal to

A dotted Semibreve **Three Minims.**

is equal to

A dotted Minim **Three Crotchets.**

8. Two dots placed after a note increases its length by *three fourths*

Thus:-  *equals*

A double dotted Semibreve **Three Minims and One Crotchet**

This applies equally to Minims, Crotchets, *etc.*

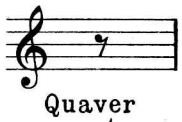
RESTS

9. Rests are characters which indicate silence, corresponding with the notes they represent

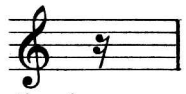
Semibreve rest

Minim rest

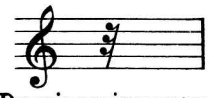
Crotchet rest



Quaver rest



Semiquaver rest



Demisemiquaver rest

DOTTED RESTS

10. A dot placed after a rest makes it *half* as long again

Thus:-  *equals* 
A dotted Semibreve rest **Three Minim rests.**

 *equals*

A dotted Minim rest **Three Crotchet rests.**

11. Two dots after a rest increases its length by *three fourths* as in the case of the double dotted note

Thus:-  *equals* 
A double dotted Semibreve rest **Three Minim and One Crotchet rests.**

 *equals*

A double dotted Minim rest **Three Crotchet and One Quaver rests.**

And so on:

TIME

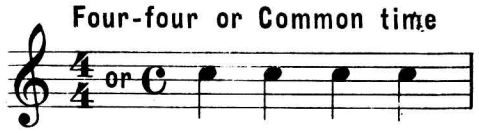
12. Music is divided in equal measures by *Bars,* formed by lines drawn across the stave,

Thus:- 
Each bar is divided into fractional portions and must contain, minims, crotchets, quavers, *etc.* or rests, to the value indicated by the **Time Signature**, which is placed at the beginning of every piece of music.

TIME-SIGNATURES

13.

Four-four or Common time



Four Crotchets in a bar
or their equivalents

Two-four time

Two Crotchets in a bar
or their equivalents

Three-four time

Three Crotchets in a bar
or their equivalents

Six-eight time

Six Quavers in a bar
or their equivalents

Twelve-eight time

Twelve Quavers in a bar
or their equivalents

Sharps, Flats, and Naturals

14. **A Sharp** (♯) placed before a note raises it half a tone or a semitone.
A Flat (♭) placed before a note lowers it half a tone.
A Natural (♮) restores it to its original sound.
A double Sharp (𝄪) placed before a note raises it two semitones or one whole tone.
A double Flat (𝄫) lowers a note two semitones.

KEY-SIGNATURES

15. Sharps, or Flats, placed at the beginning of a stave are to denote the key in which the music is written, and is termed, the **Key-Signature.**

Example, A sharp placed thus indicates that all **F's** are to be played sharp unless a natural (♮) is placed before one of them thus

Sharps or flats placed before notes, and not marked in the Key signature, are termed *Accidentals,* and take affect throughout the bar unless contradicted by a natural (♮).

Thus:-

The **C** in the second bar is a natural.

MUSICAL TERMS

Signs and Expressions in general use

16.

ACCELLERANDO	*Gradually increase speed*
ADAGIO	*Slow. a little slower than Andante*
AD LIBITUM or AD LIB.	*At discretion*
ALLEGRO	*Quickly, lively*
ANDANTE	*Slowly*
ANIMATO	*Lively, animated*
A TEMPO	*Return to original time*
CODA	*A few bars added for an effective ending*
CRESCENDO	*Gradually increase sound*
DA CAPO or D.C.	*From the beginning*
DIMINUENDO or DIM.	*Gradually decrease sound*
DOLCE	*Softly*
ESPRESSIVO	*With expression*
FINE	*The end*
FORTE *(f)*	*Loud*
FORTISSIMO *(ff)*	*Very loud*
LENTO	*Slow*
MARCATO	*Marked, accented*
MARCIA	*A March*
MEZZO	*Half*
MEZZO FORTE *(mf)*	*Midway between Piano and Forte*
MODERATO	*Moderately*
PIANO *(p)*	*Soft*
MEZZO PIANO *(mp)*	*Moderately soft*
PIANISSIMO *(pp)*	*Very soft*
PRESTO	*Quick*
RALLENTANDO	*Gradually slower*
RITENUTO or RIT.	*Retard*
TEMPO	*Time, used to indicate rate of movement* Example. **Tempo di Marcia** *(March Time)*

Gradually increase sound.  Gradually decrease sound. Pause

This sign > over a ncte means that the note is to be accented. An Interval is the distance between two notes, or sounds.

GRACE NOTES

A Grace-note is a small note placed before the main note, thus and care must be taken not to give it undue prominence as it is a purely ornamental note.

HARMONICS

Harmonics are produced by placing a finger of the left hand lightly on the string and removing it immediately it has been played.

Harmonics can be obtained at the 12th, 7th, 5th and 19th frets on the first, second, third and fourth strings, and at the 17th fret of the fifth string, these are natural harmonics. Other harmonics (termed artificial) can be produced by stopping the string at any fret and placing the first finger of the right hand lightly on the string twelve frets higher and playing it with the thumb.

THE RASP

The Rasp is an effect produced by drawing the fingers smartly across the strings with a downward movement, starting with the fourth finger and following with the third, second, and first.

The Fingerboard of the Banjo

The Fingerboard of the Banjo is spaced off by frets, and notes are made by pressing the strings down on to the fingerboard between the frets with the fingers of the left hand.

THE VELLUM

The Vellum or skin of the banjo should be kept tightly stretched as it is the sounding board. Care should be taken to protect it from any moisture, and it should not be placed near a fire or it is likely to burst.

THE BRIDGE

The Bridge should not be made too thick and should have a little powdered resin on each foot to prevent it from slipping. Always keep the bridge in position if possible, but it is best to take it down when travelling.

THE STRINGS

There are five strings on the banjo. The first is tuned to **D**, the second to **B**, the third to **G**, the fourth to **C**, and the fifth or octave to **G**, an octave above the third string.

Position of the Right Hand.

The right hand should be held over the strings so that the second finger picks the first string about $2\frac{1}{2}$" from the bridge.

The thumb should be extended as shown.

Position of the Left Hand.

The wrist of the left hand should be well away from the arm of the banjo and the fingers should be placed behind the frets as shown.

Harmonics.

The hand should be held as illustrated. Details are given on page 6.

How to Tune the Banjo

First tune the third string to **G**, then press this string down at the fourth fret, which will make the note **B**. Tune second string to this note, then press the second string down at the third fret, this note will be **D**. Tune first string to this note, then tune the fifth string an octave above the third string **G**. Now press the second down at the first fret, this note will be **C**. Tune fourth string an octave below this note. I have found this the best method, for the beginner. When the student has done this a few times he will be able to tune by ear.

Below are the notes of each string and the order of tuning.

This sign on the High **G** signifies that the note is to be played on the 5th string.

Positions and Barré

The **Position** notes or chords are made by placing the tips of one or more fingers of the left hand on the strings at the frets indicated by fingering placed above the notes or chords.

Barré means that one finger is placed across two or more strings at the same fret.

Position Barré means that two or more notes are made at one fret with one finger, while other notes are made at different frets by other fingers.

Triplets

A **Triplet** is written thus

and signifies that the three notes are to be played in the time of two.

Example.

A better example.

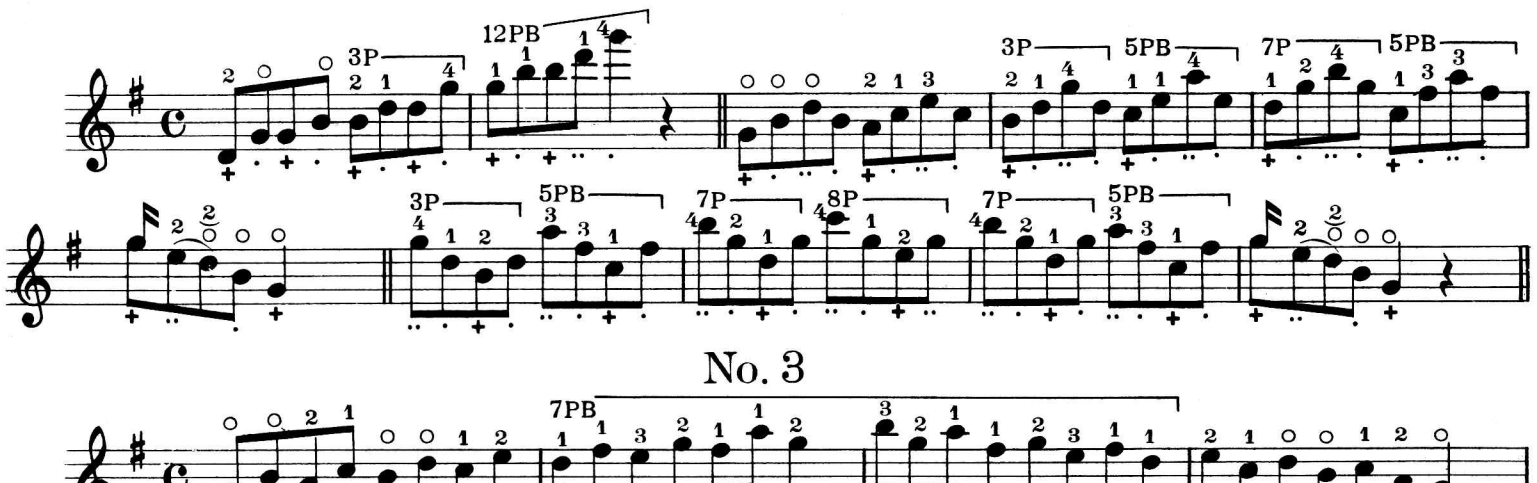
The latter is better because the Triplet is mostly used in a piece which has dotted notes.

Exercises

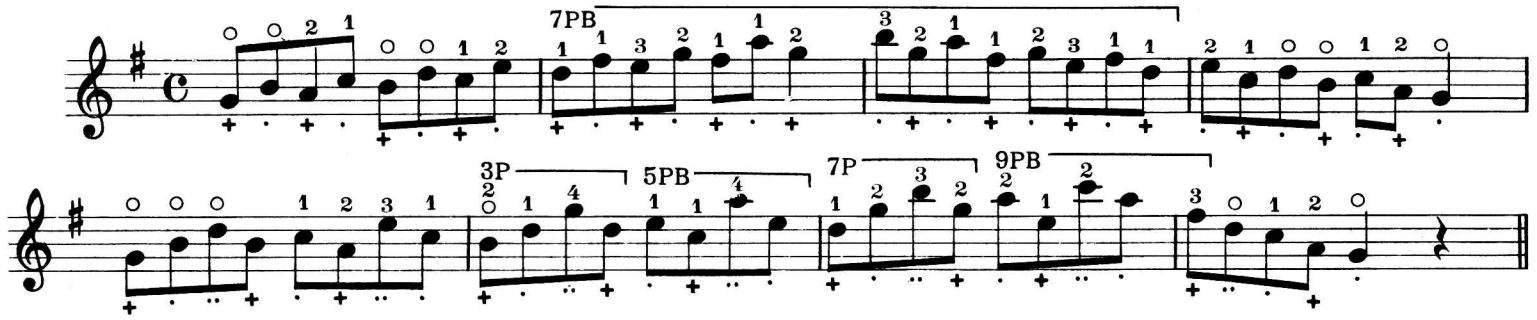
No. 1

No. 2

To be played slowly in order to give each note its full value and to produce a full, rich tone: the speed to be gradually increased without loss of tone.



No. 3



No. 4

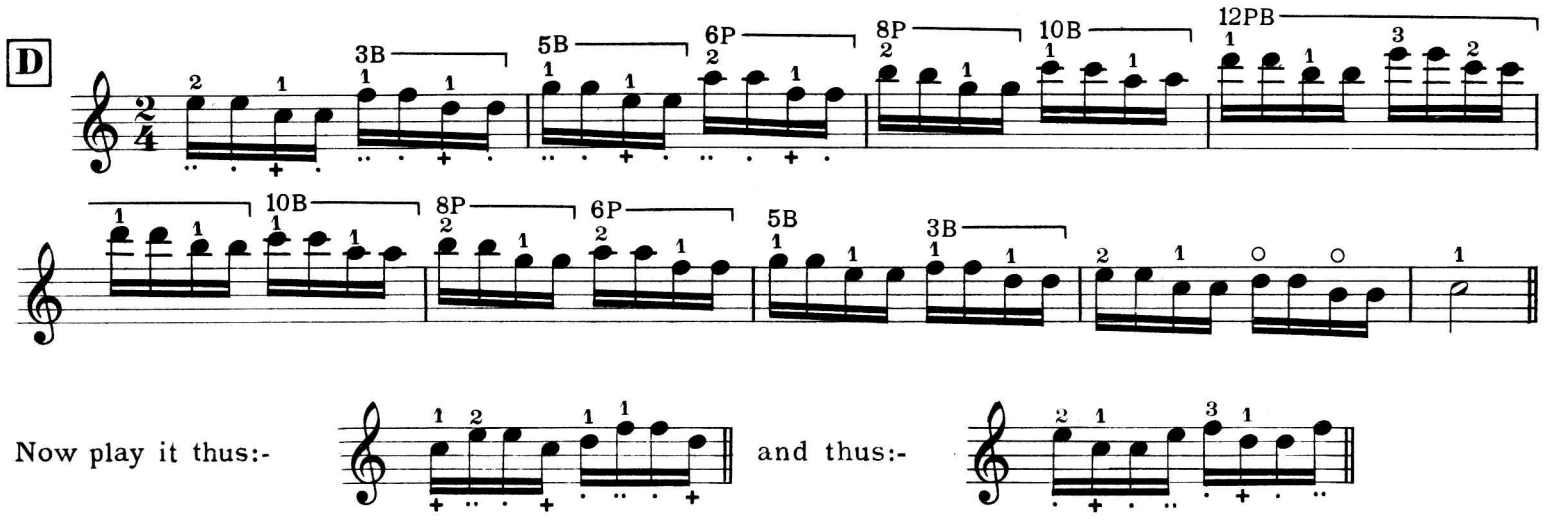
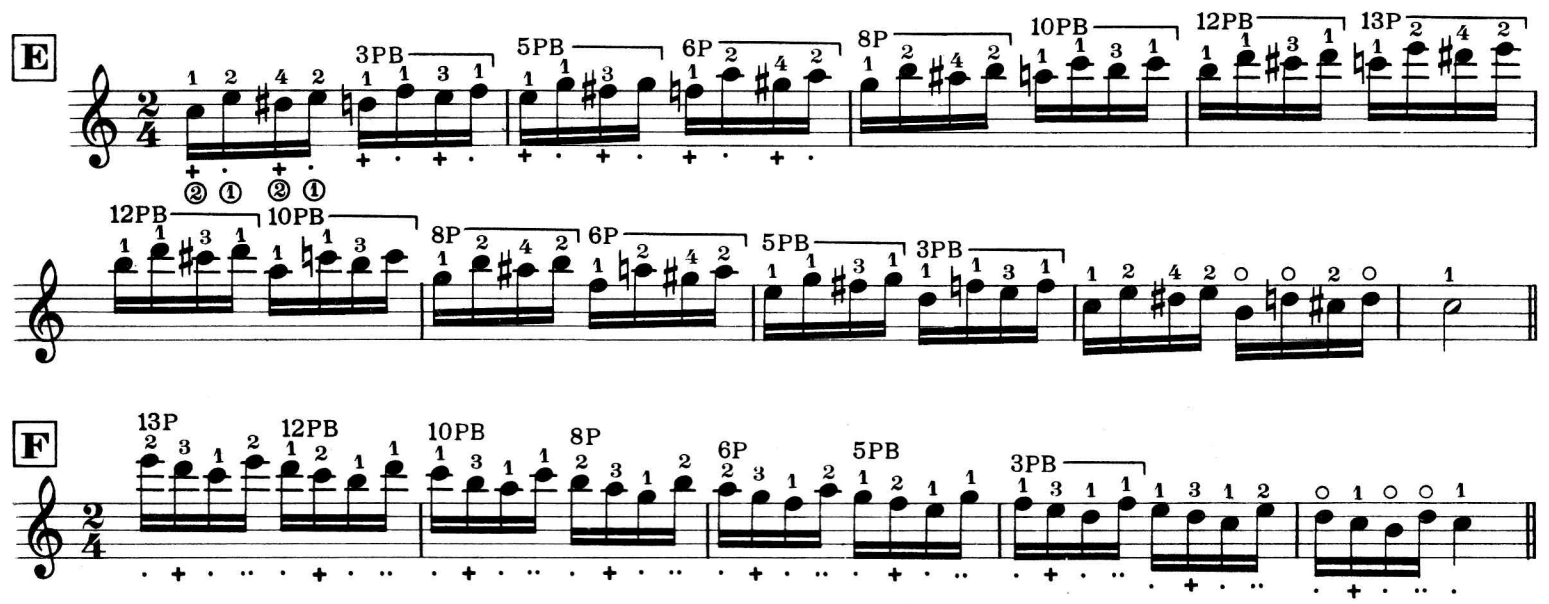
EXERCISES BUILT ON THIRDS



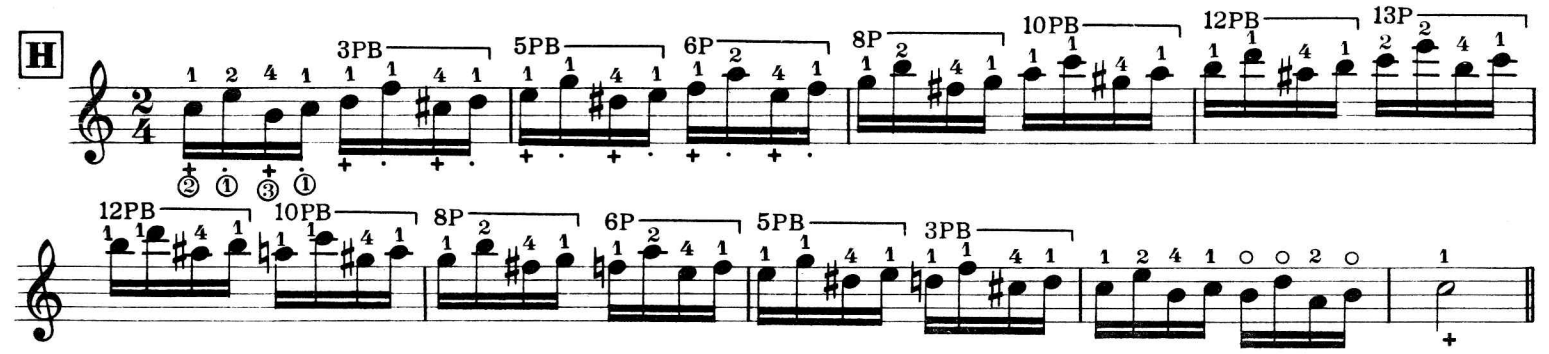
Now play it thus:-

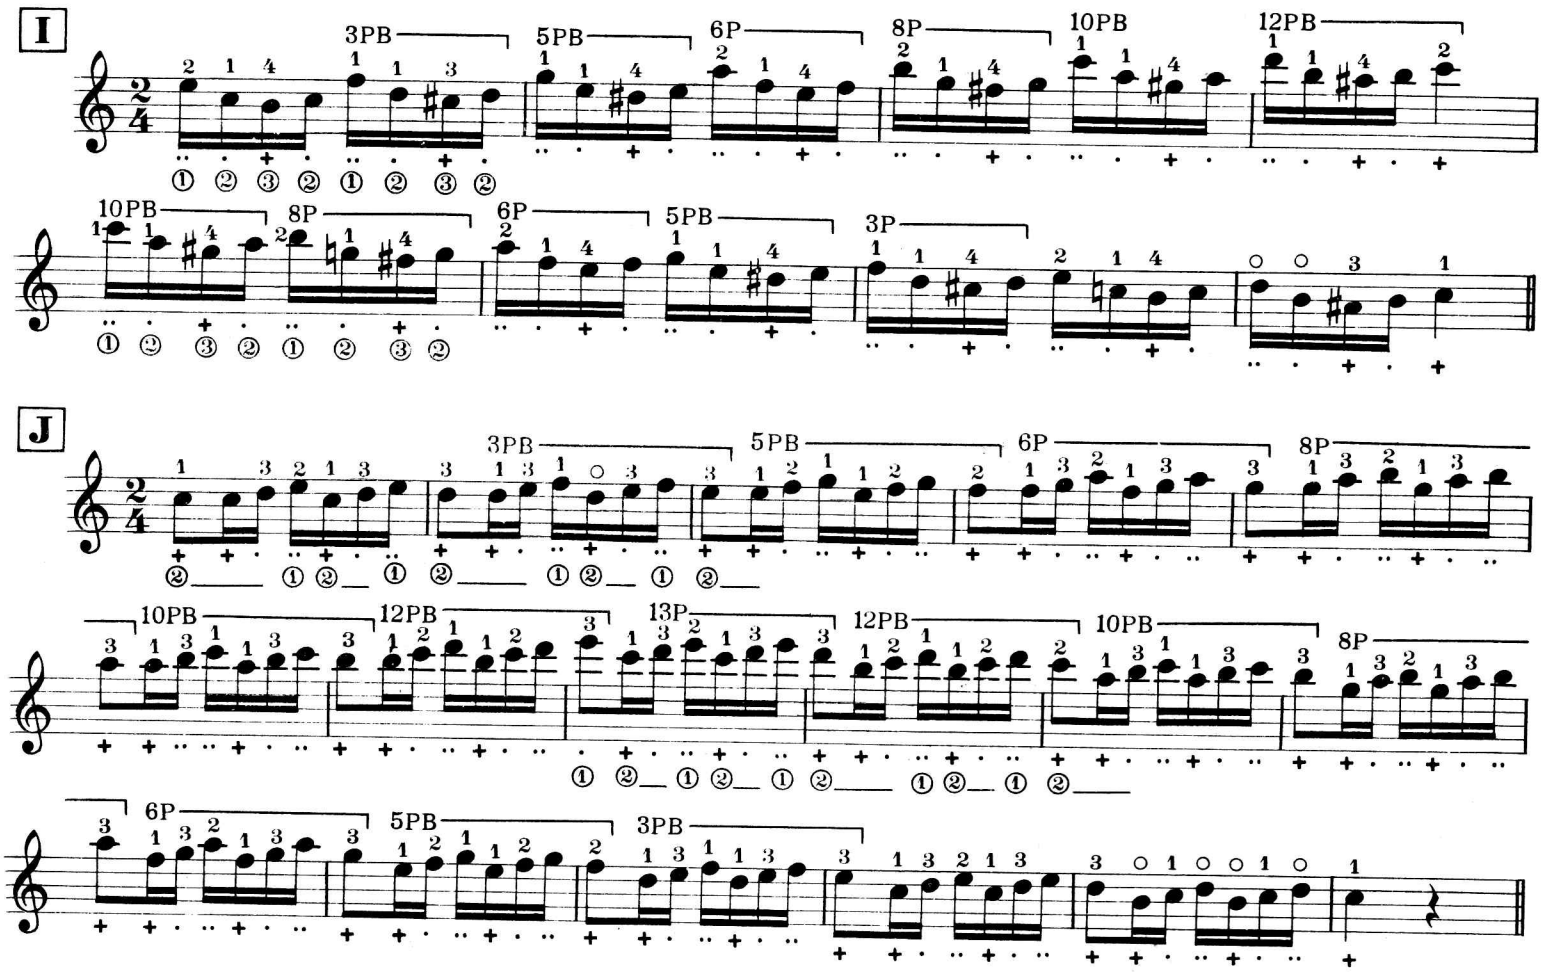
and thus:-



No. 9

This Exercise can also be played in either style of right hand fingering

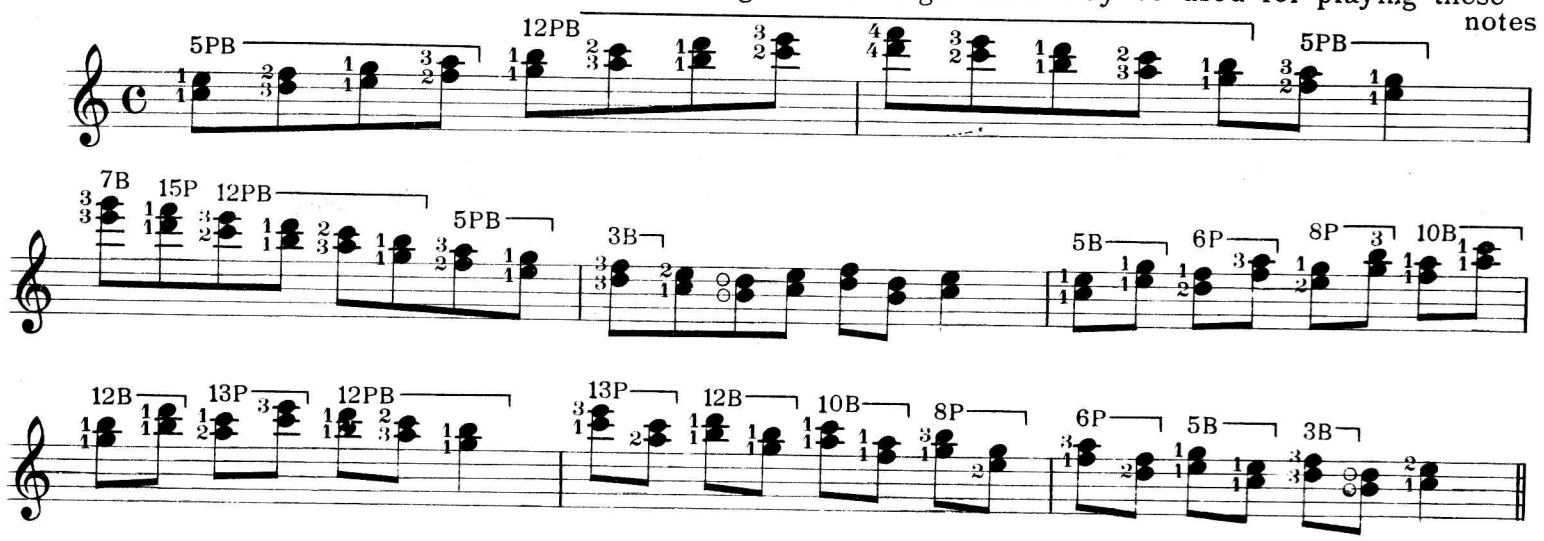




No. 10

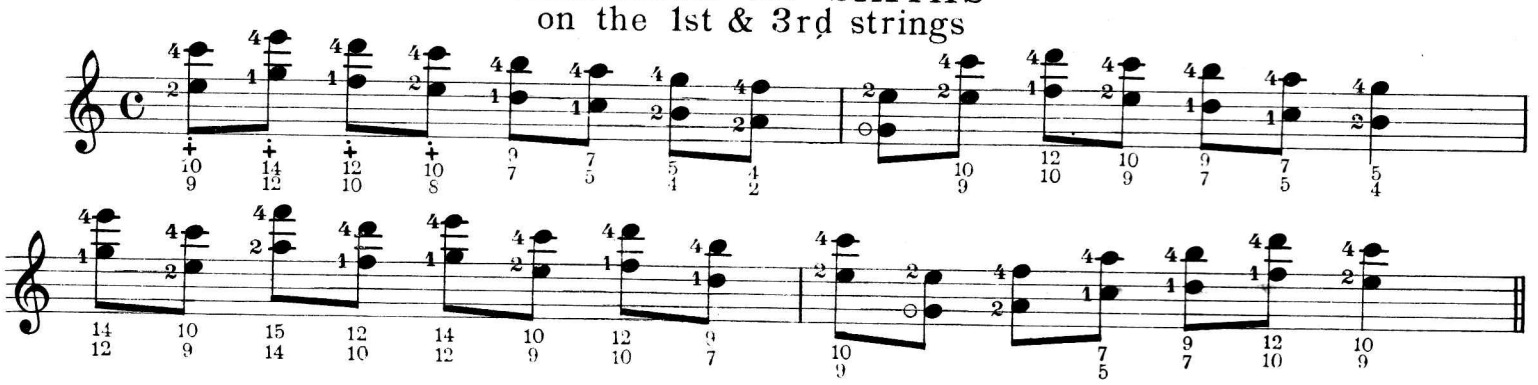
EXERCISE IN THIRDS

The 1st & 2nd fingers or thumb and first finger of the right hand may be used for playing these notes



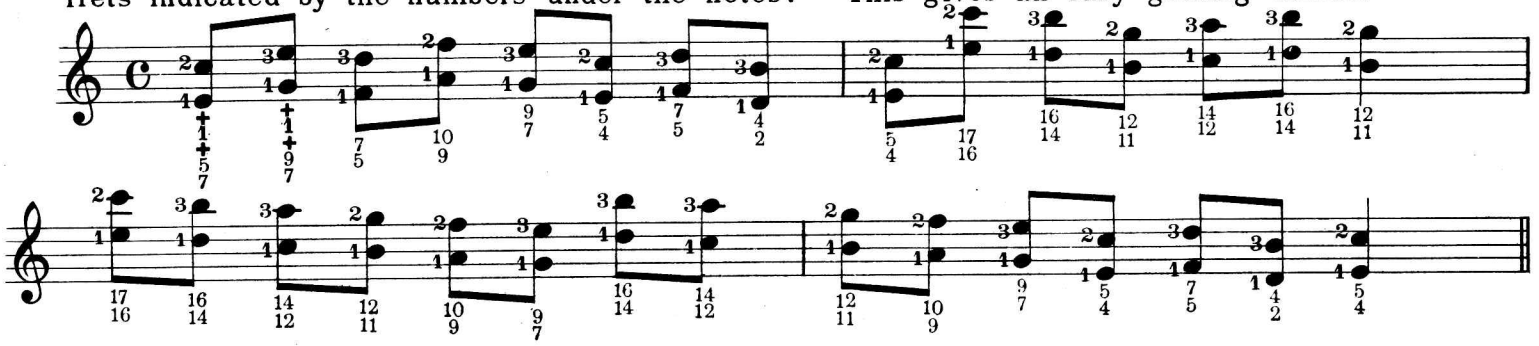
EXERCISE IN SIXTHS

on the 1st & 3rd strings

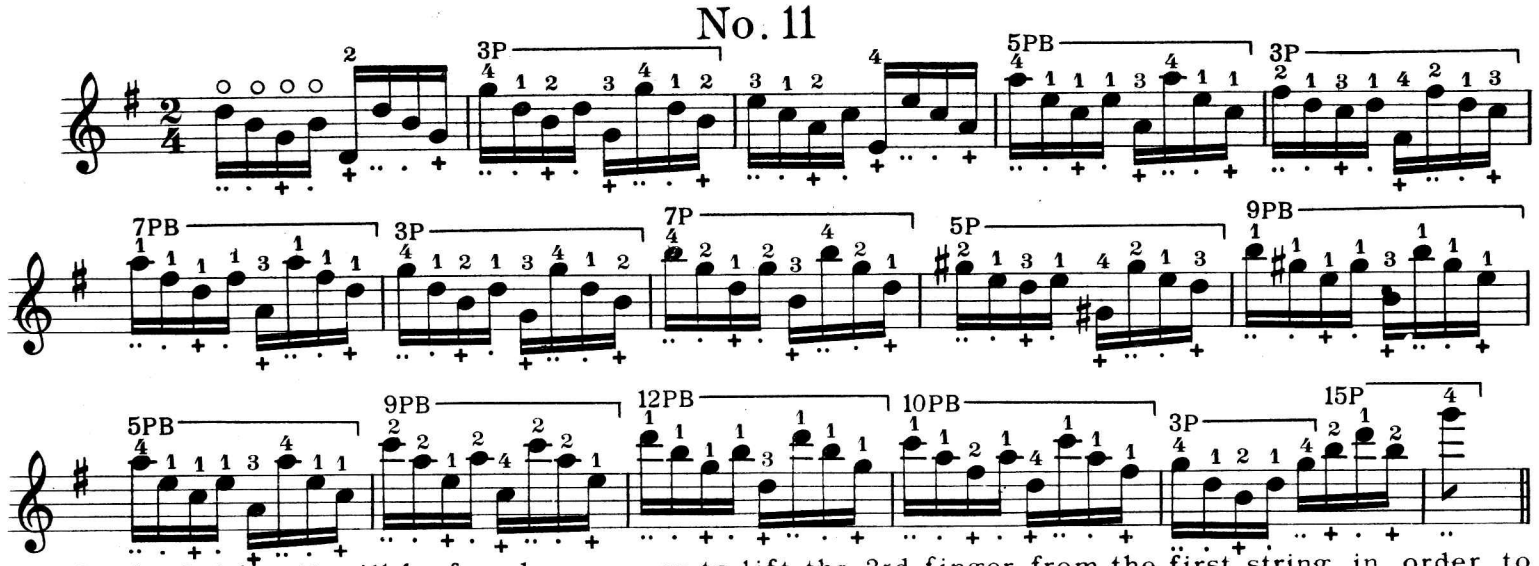


EXERCISE IN SIXTHS
on the 3rd & 4th strings

The student will see that in this exercise, the 1st finger of the left hand is used to stop all notes on the 4th string. It is best to keep this finger on the string and slide up and down to frets indicated by the numbers under the notes. This gives an easy gliding effect.

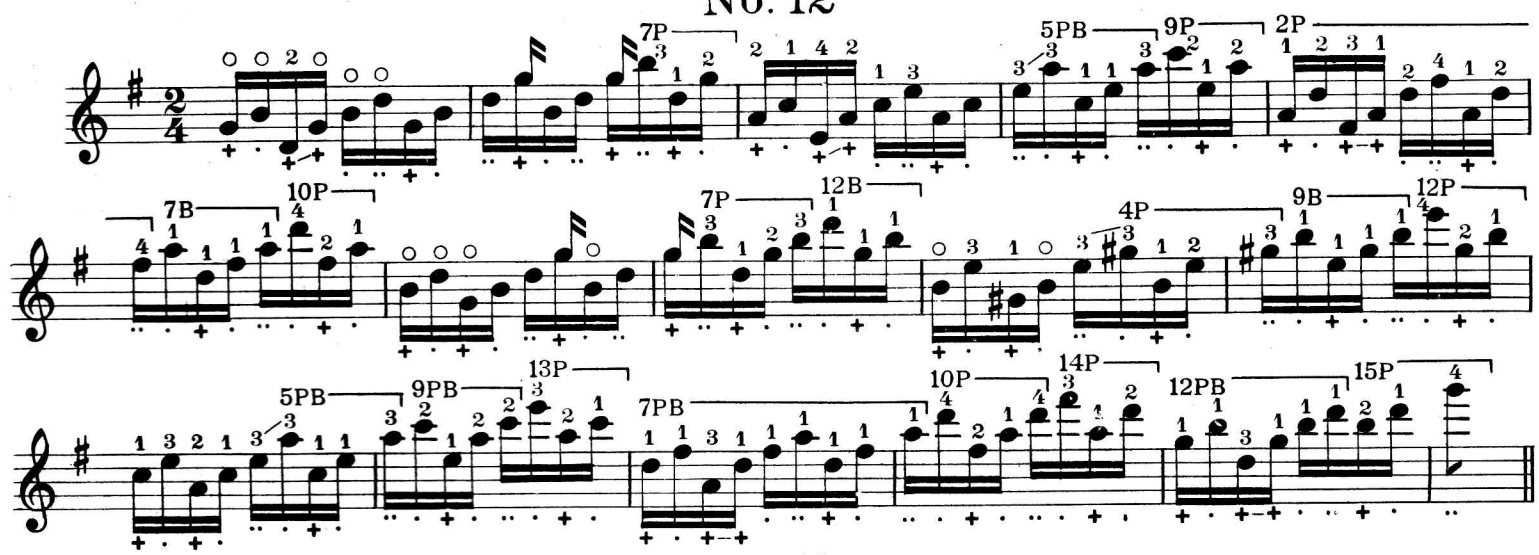


No. 11

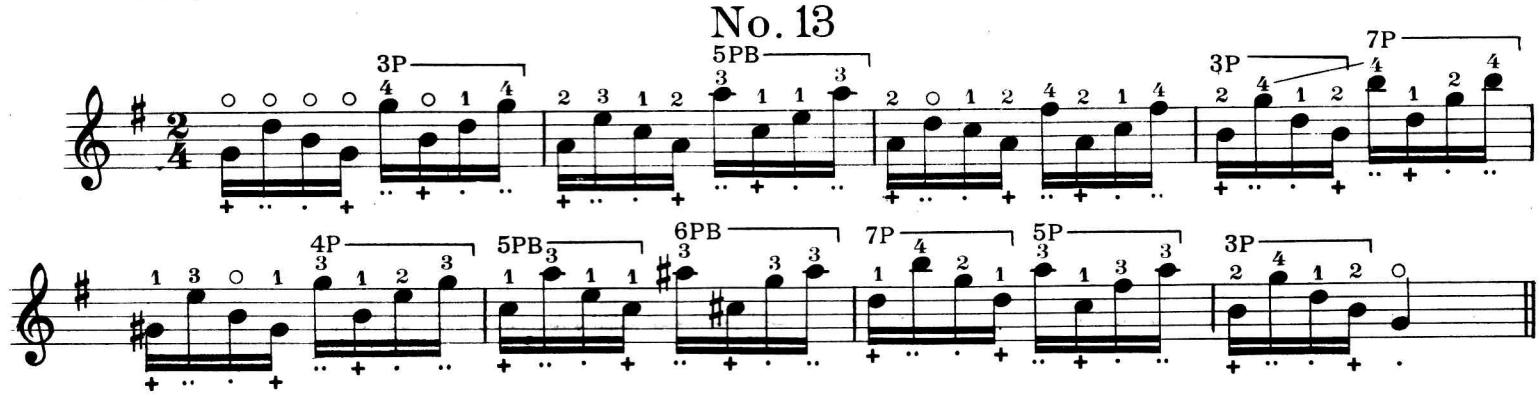


In the 3rd bar it will be found necessary to lift the 3rd finger from the first string in order to finger the 'E' on the fourth string with the 4th finger with greater ease.

No. 12

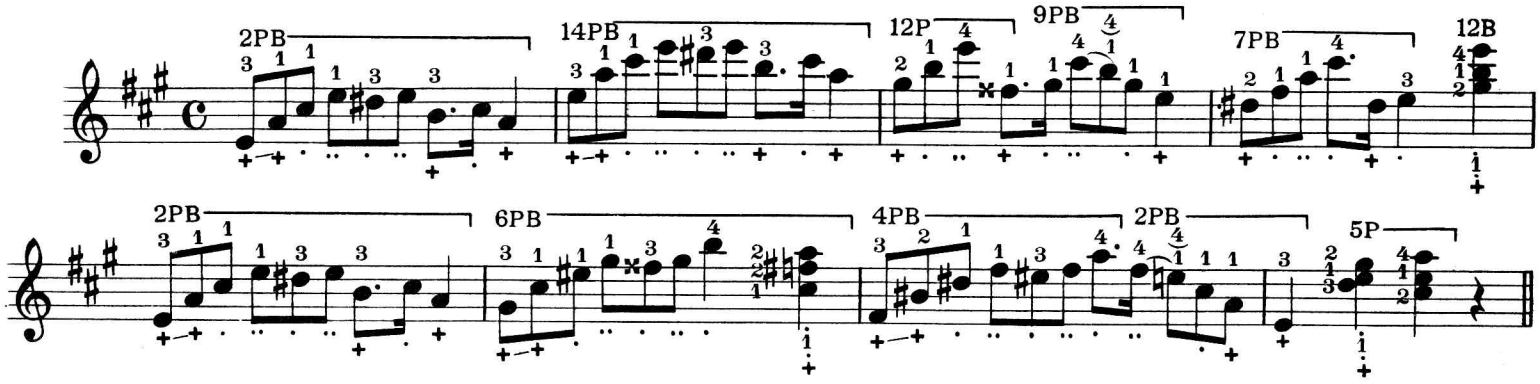


No. 13



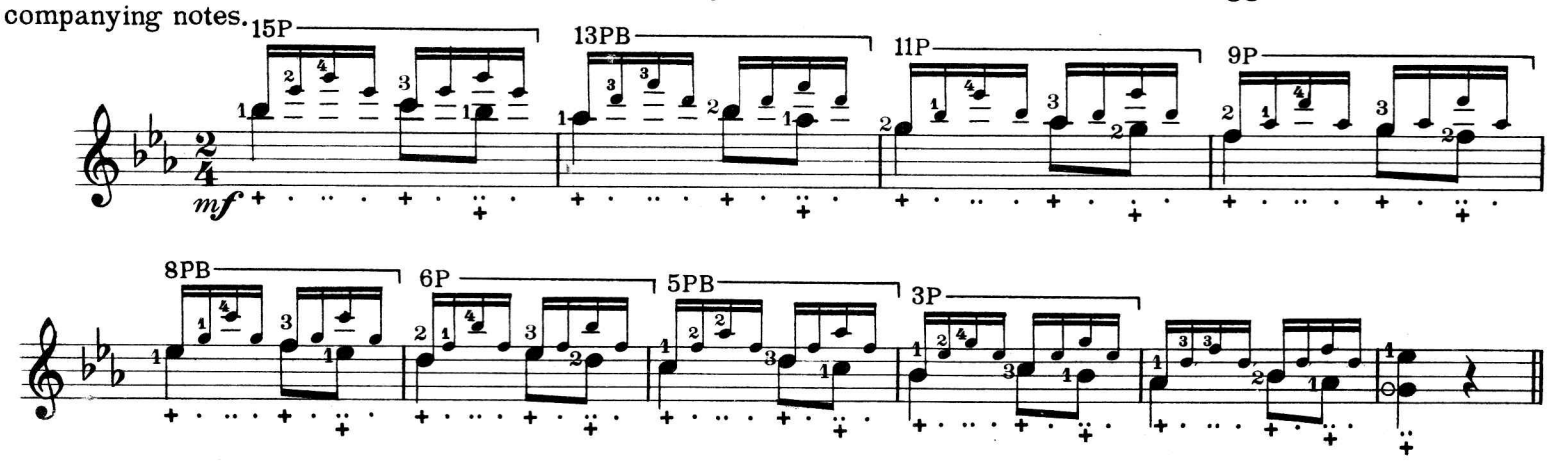
No. 14

The student will see that the 'F' of the chord at the end of the sixth bar has a natural and sharp placed before it thus: This is to contradict the double sharp placed before the previous 'F' in the same bar.



No. 15

Care must be taken to accent the melody notes which in this case are bigger than the accompanying notes.

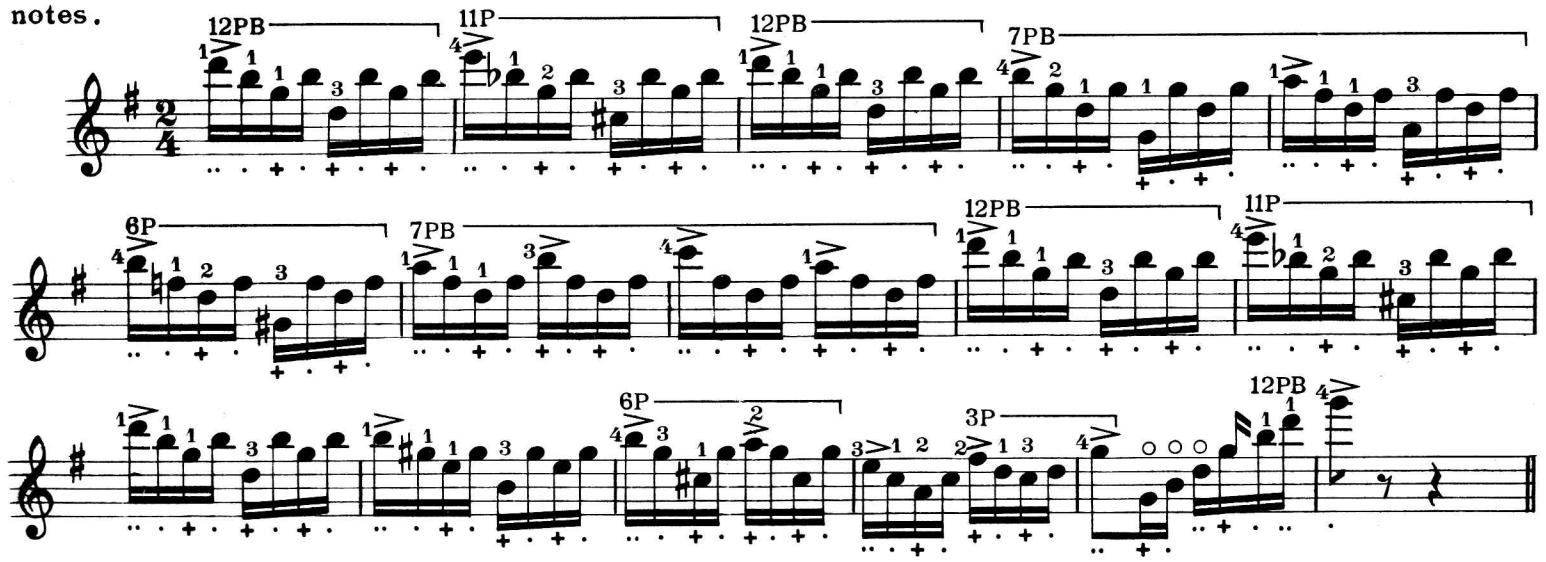


No. 16

A rolling exercise in C major. With repeated notes on the second string.

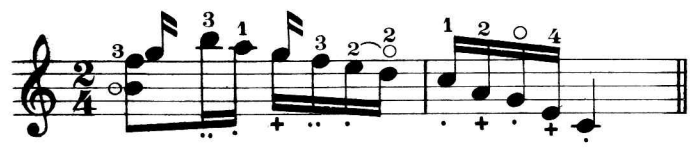
No. 17

This Exercise is written for the purpose of strengthening the 2nd finger of the right hand. Each melody note has an accent (>) above it, and should be played a little louder than the other notes.



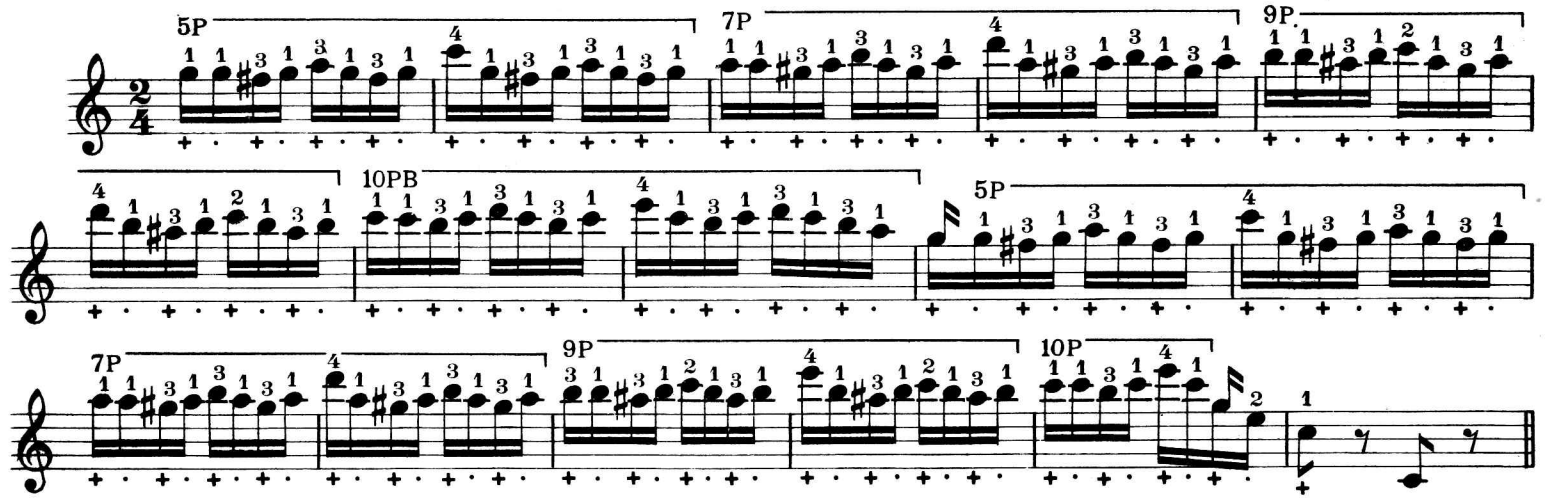
No. 18

No. 19



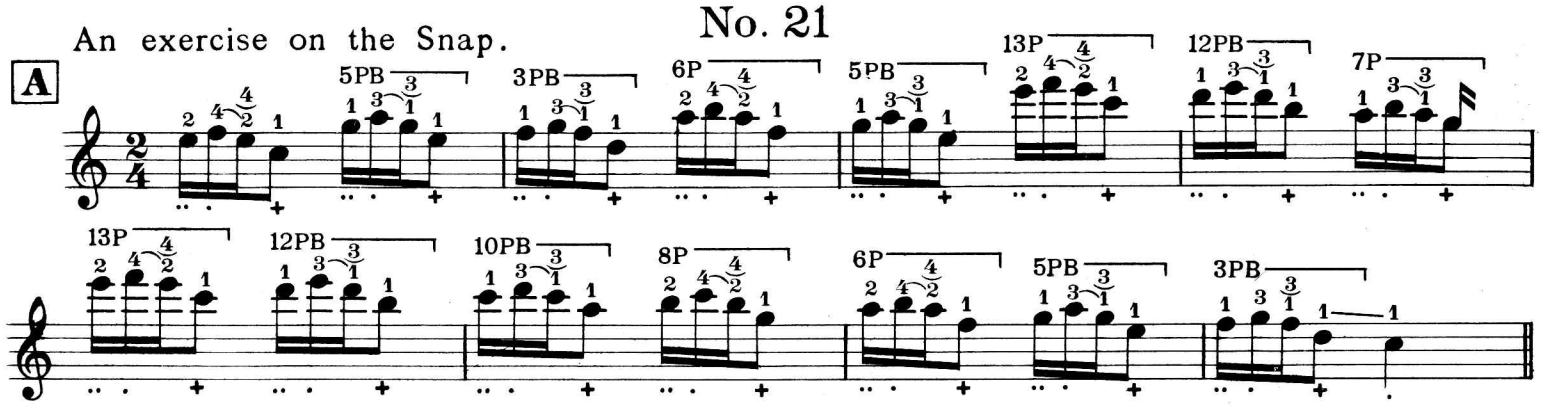
This short exercise is put in because such a phrase is often met with in solos and the above will show the best and simplest way of fingering it.

No. 20

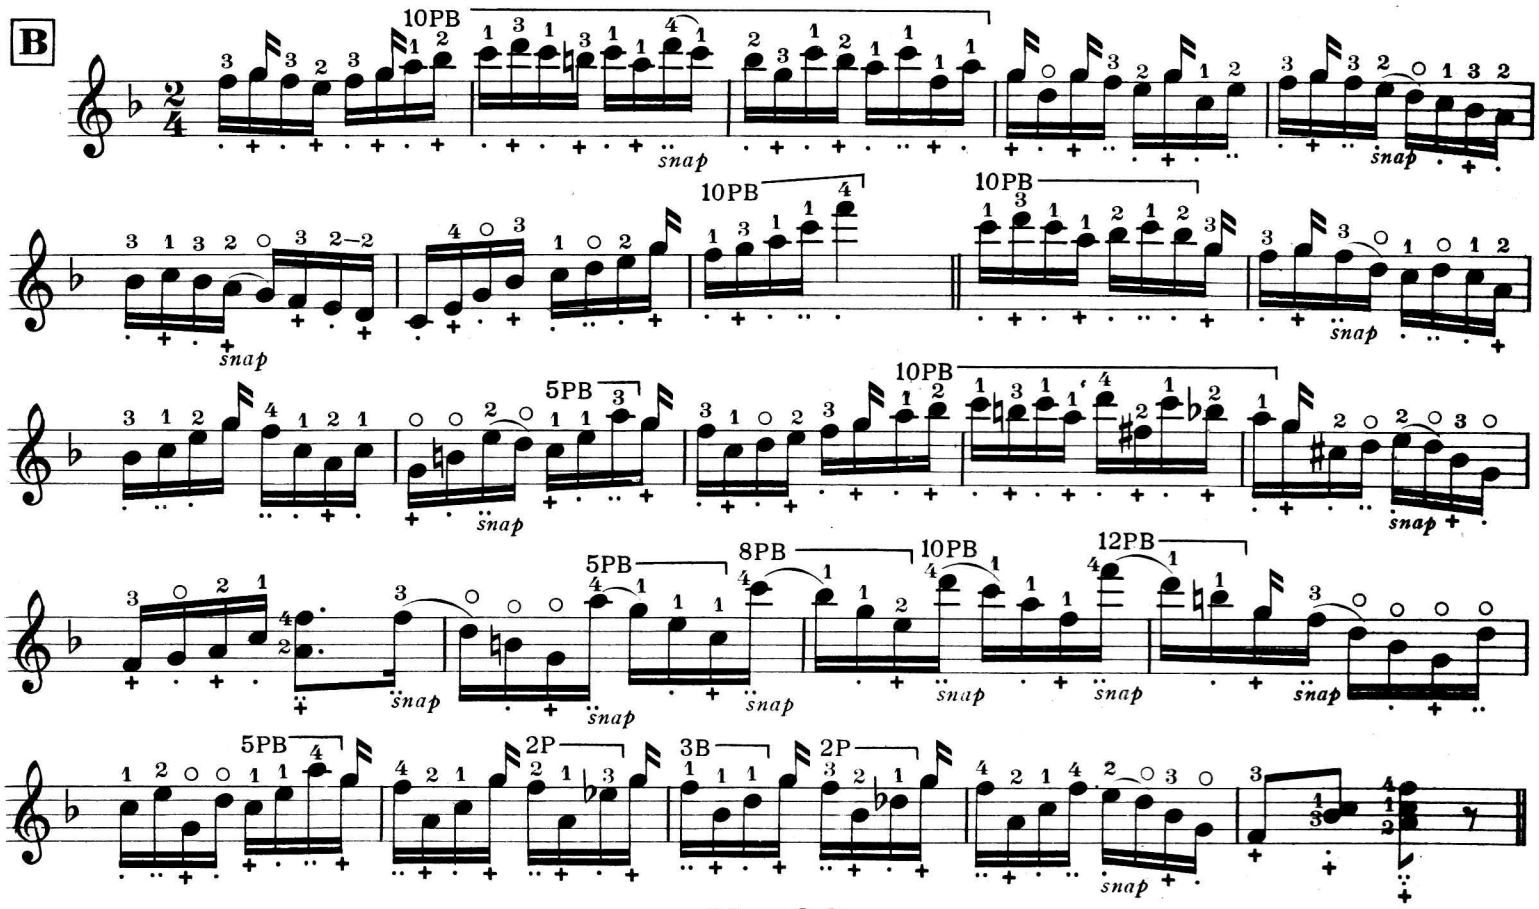


No. 21

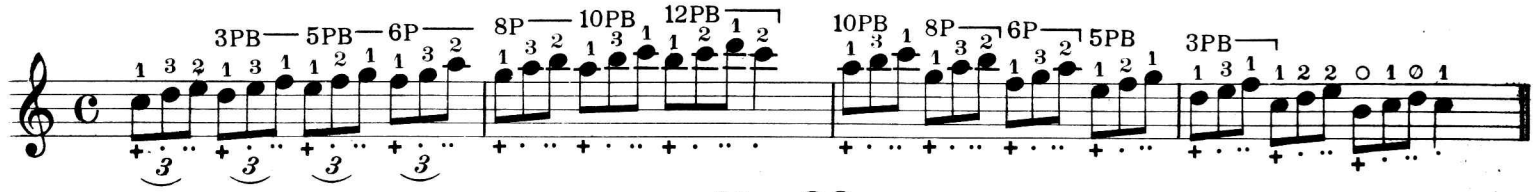
An exercise on the Snap.



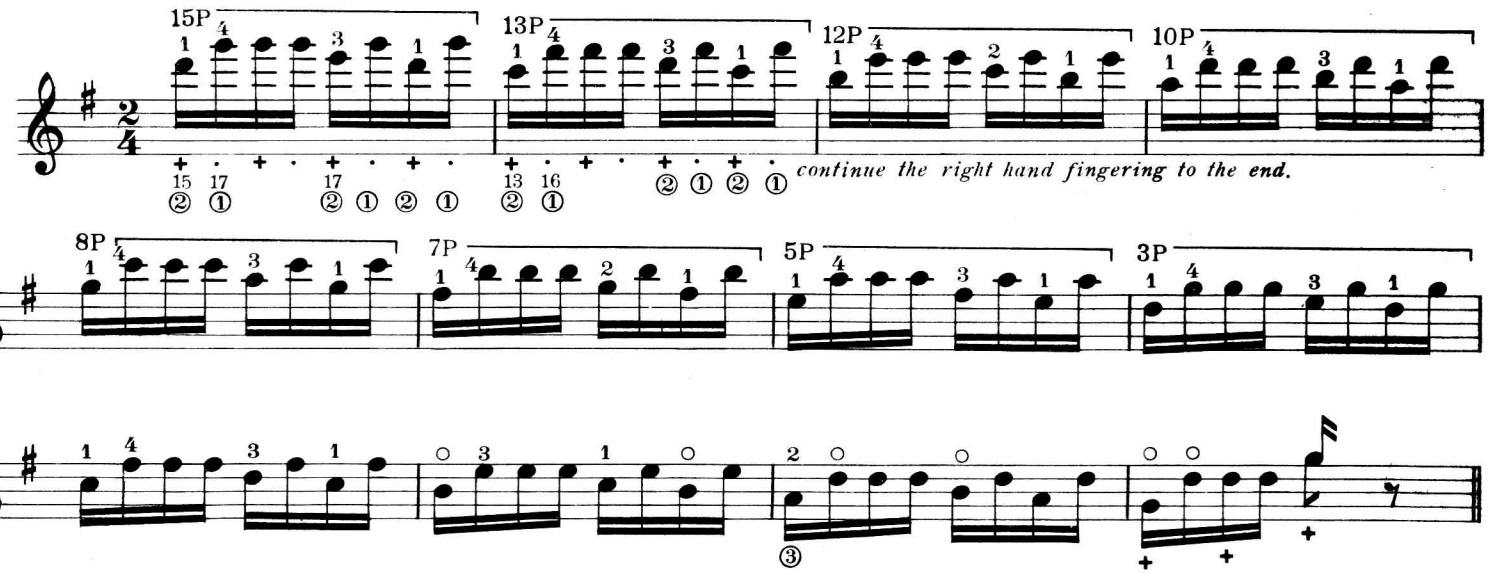
To show the student the good use that can be made of the *snap*.



No. 22



No. 23

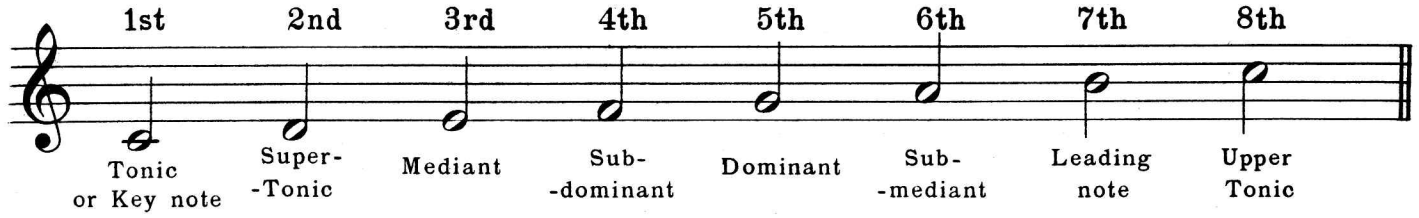


No. 24

THE DIATONIC SCALE

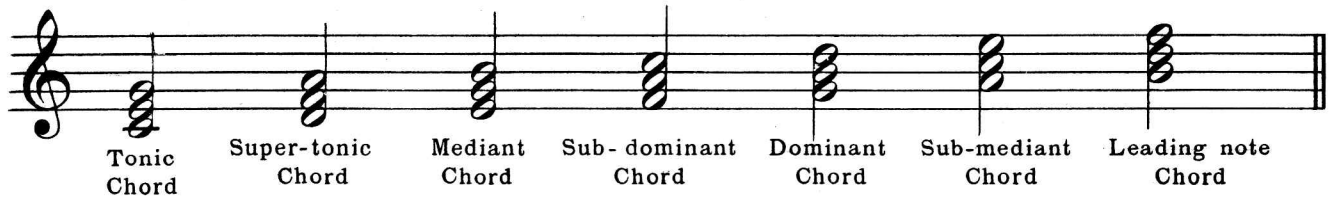
Each note of a **Diatonic Scale** has its technical name, as the following will show.

Scale of C Major



This applies to all Diatonic scales.

Chords are formed thus:

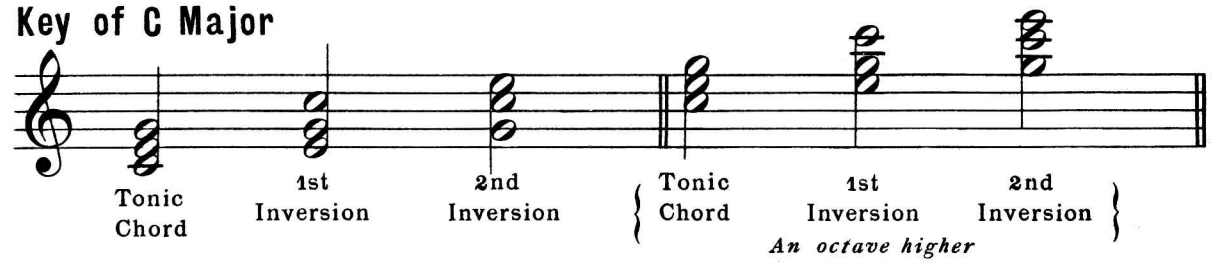


Inversions

Any of these chords can be inverted by removing the lowest note and placing it an octave higher.

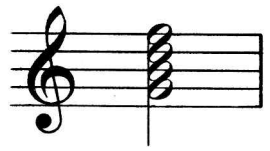
Key of C Major

Examples



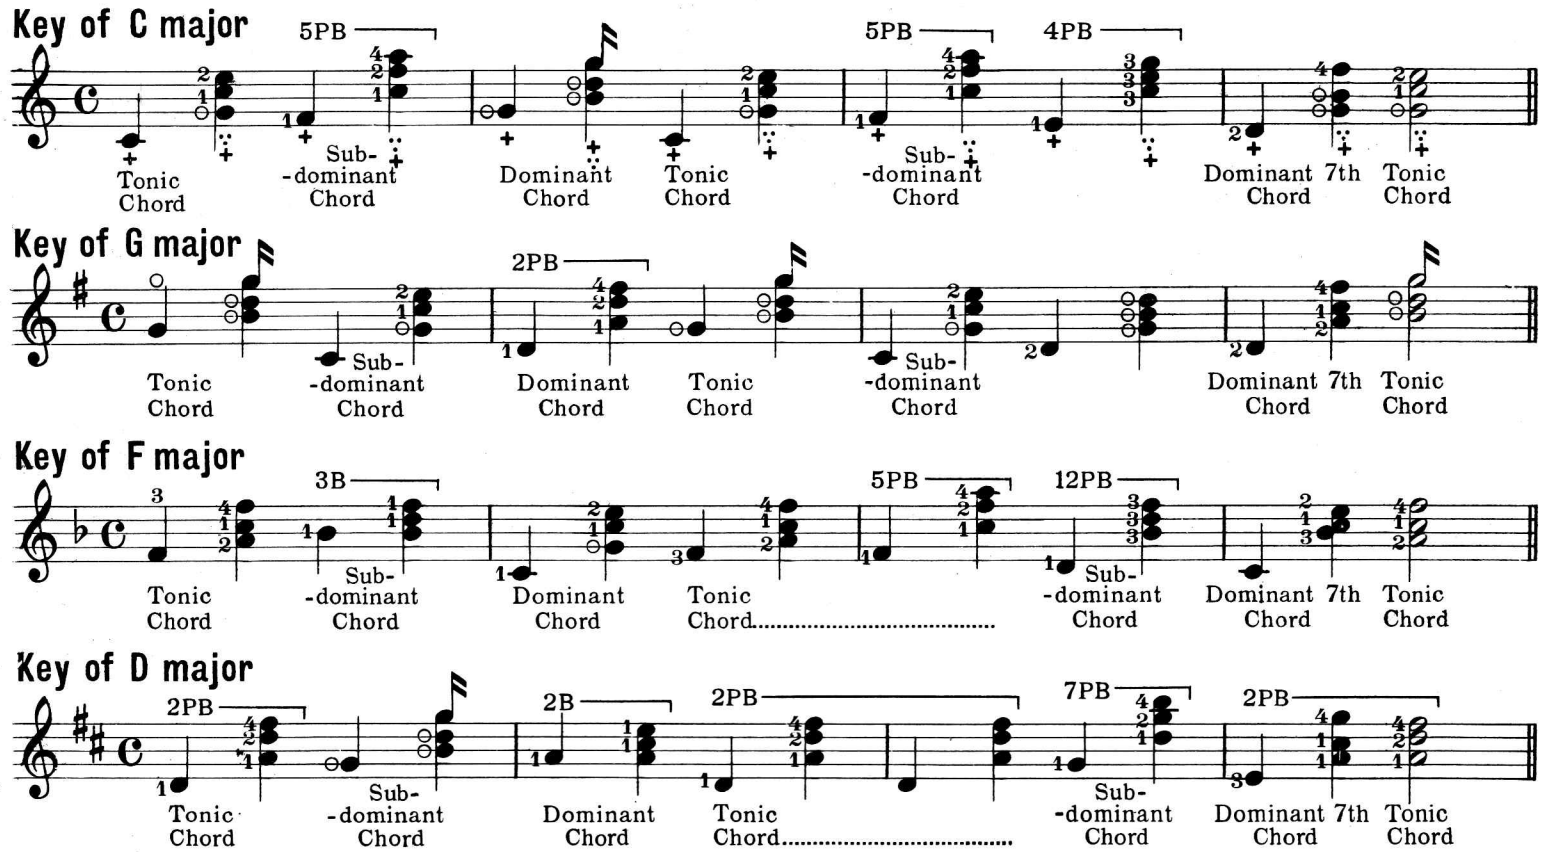
The above applies to all keys.

Another chord greatly used is the Dominant Seventh.



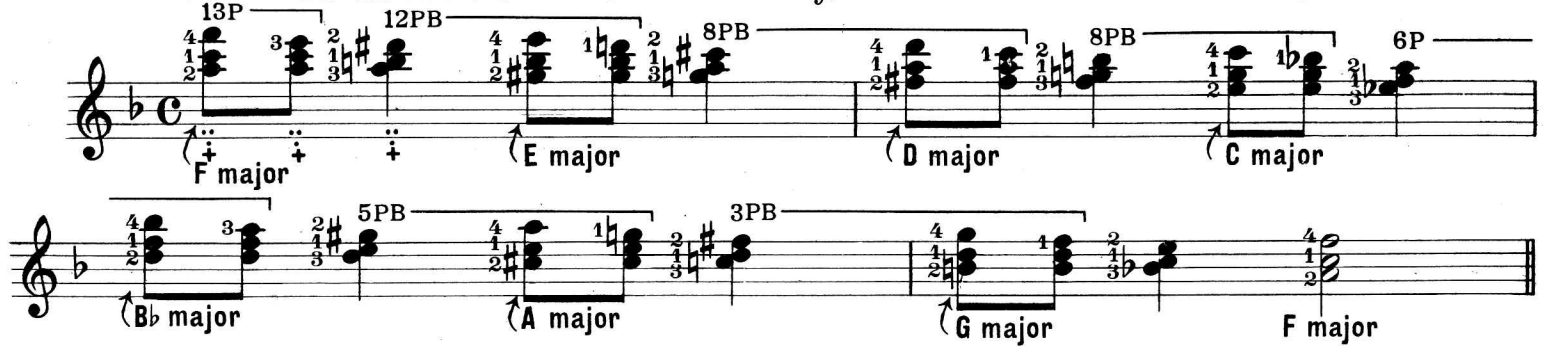
EXAMPLES OF CHORDS

as used on the banjo for accompanying

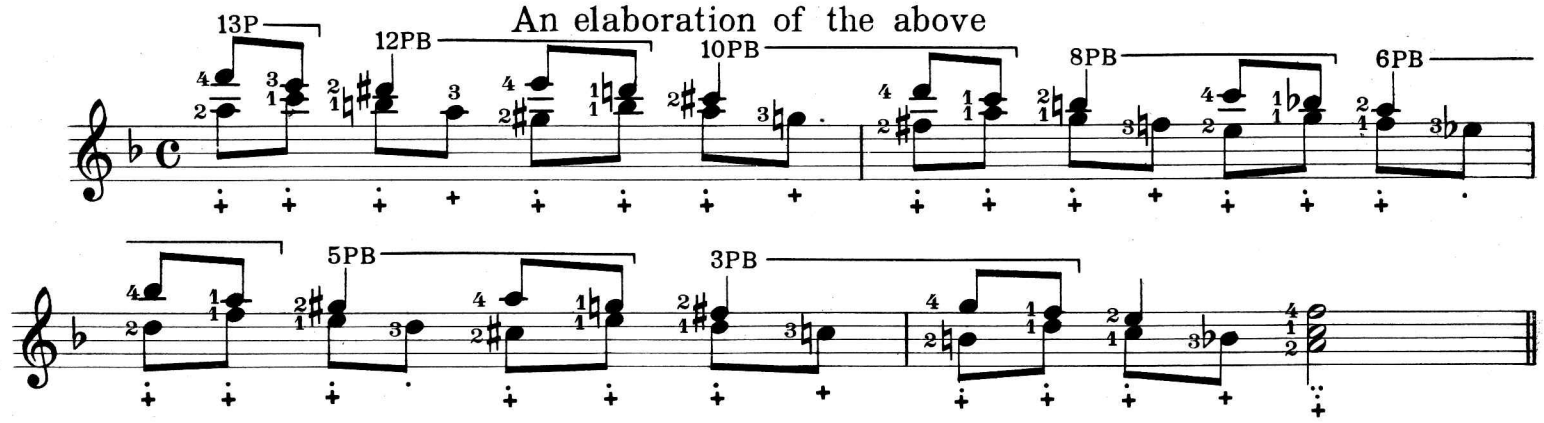


DESCENDING THE SCALE IN CHORDS

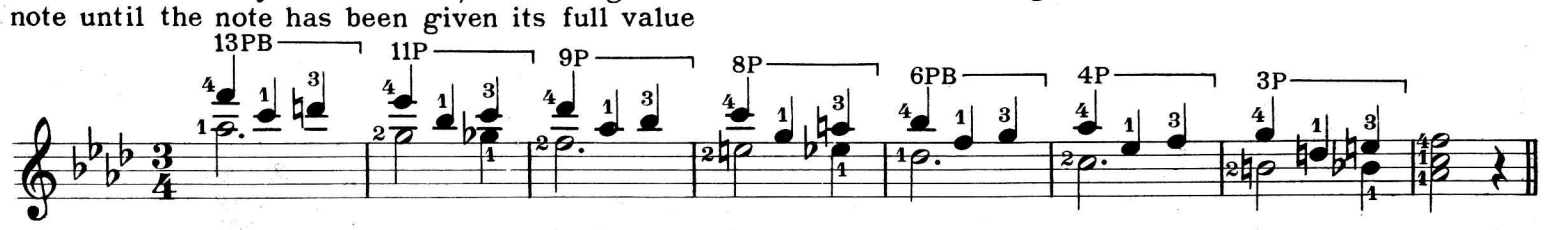
The student will see that the chords are resolved diatonically.



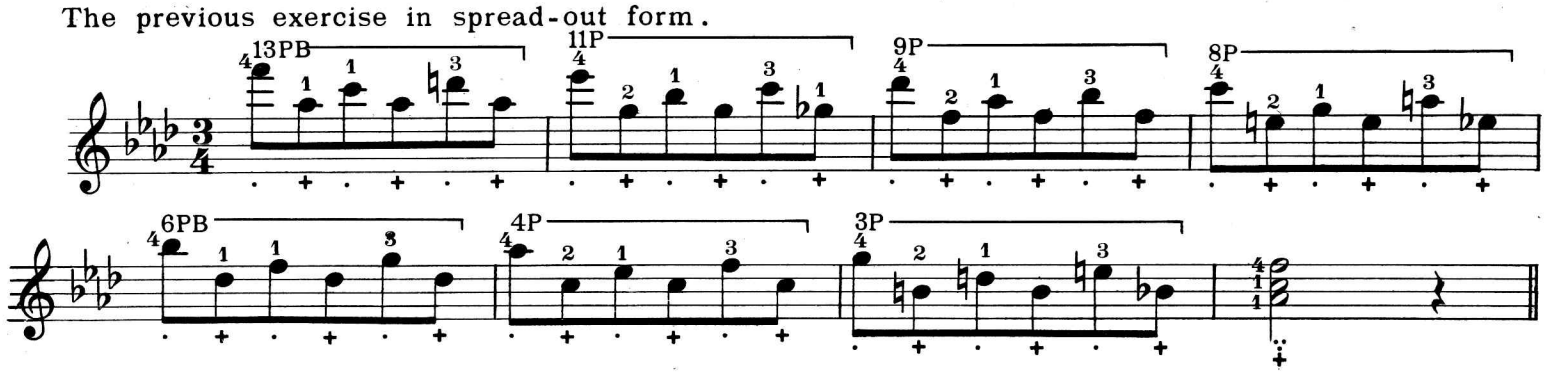
An elaboration of the above



A similar study to the above; care being taken not to remove the finger of the left hand from the lower note until the note has been given its full value



The previous exercise in spread-out form.



CHORDS IN MAJOR AND MINOR KEYS

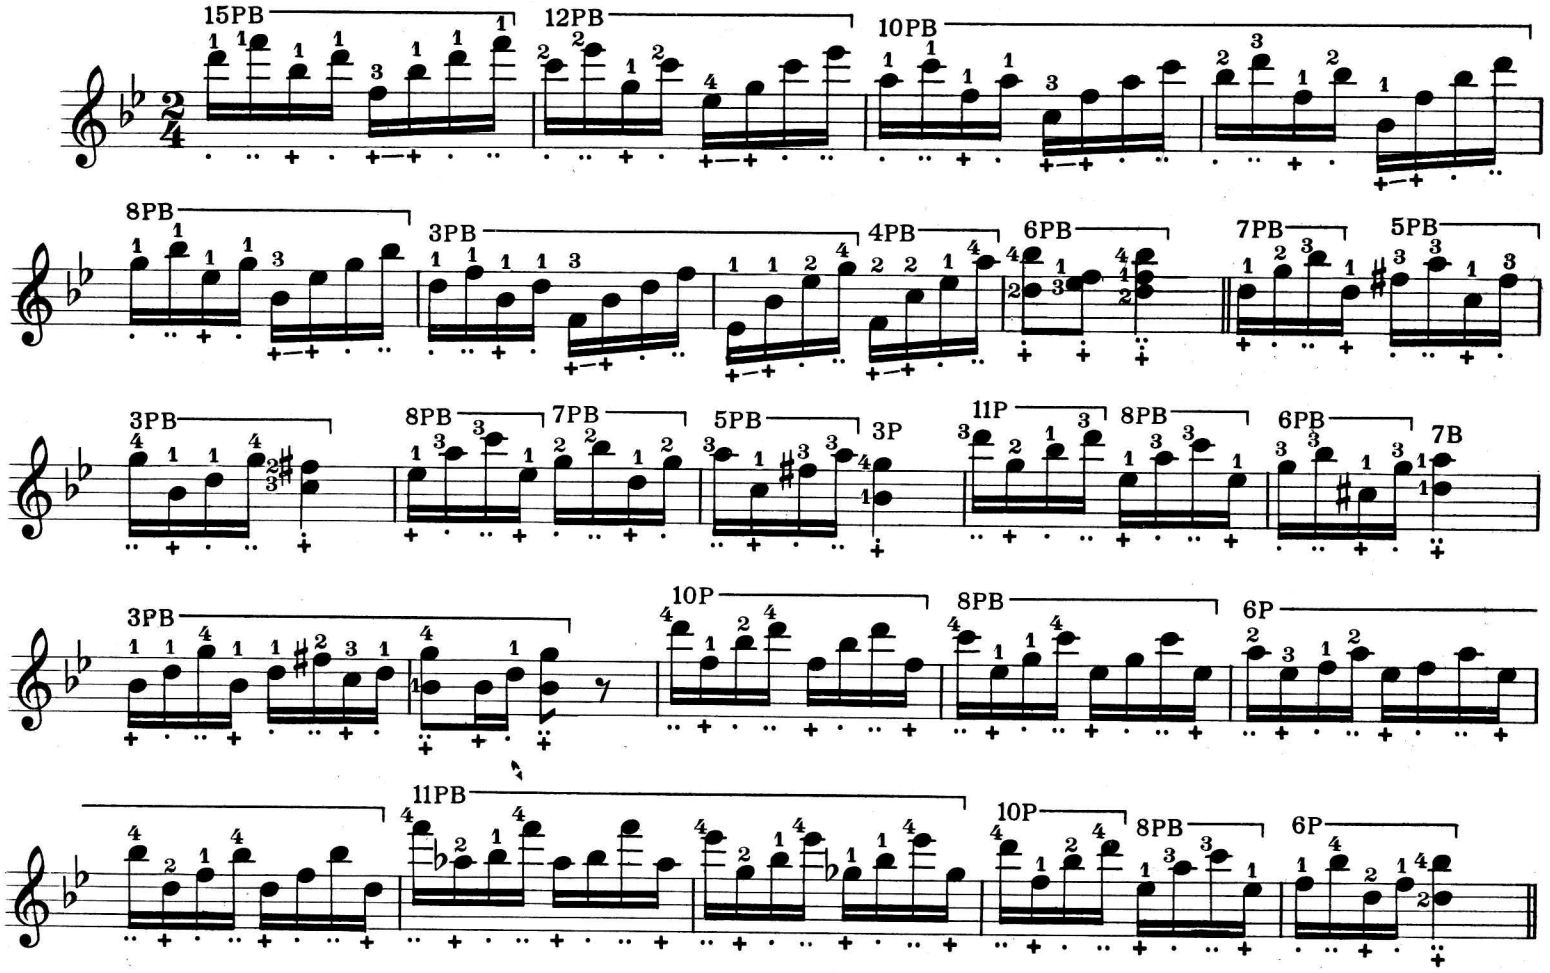
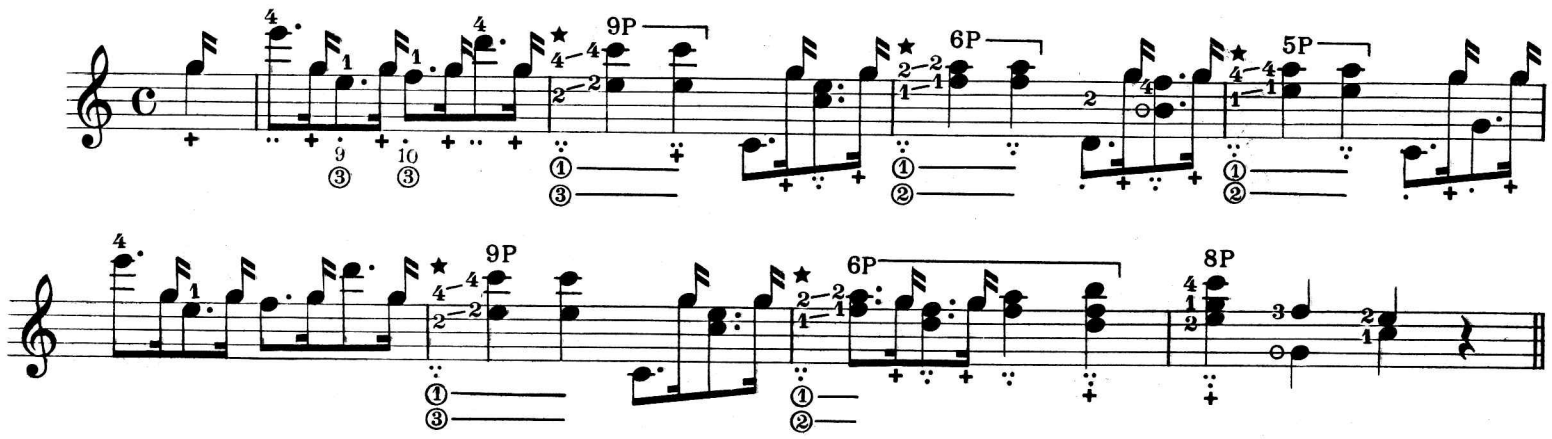
No. 20 (daily)



The following eight bars are part of a movement in *"Mauna Loa"* a banjo solo, in which there are slides that may confuse anyone who does not know how they should be played. They are in the 2nd, 3rd, 4th, 6th and 7th bars, and are marked with an asterisk (★). They should be played thus,— place fingers of the left hand on the strings as marked, 4 or 5 frets below the position and strike the strings, at the same time as you would if you were playing the actual notes, then slide slowly up in time to play the second chord.

This will give an Hawaiian Guitar effect, place a cork between the Perch and the Vellum, near the bridge, not too tightly fitted, and the resultant slides will be much better.

EXAMPLE OF THE SLIDE



Finger Tremolo

Chord Tremolo, Melody Tremolo with thumb accompaniment and Brushing the strings

Tremolo is produced by striking one or more strings rapidly backward and forward with the first or second finger of the right hand. This obtains as near as possible the effect of sustained notes or sounds.

CHORD TREMOLO

The student should first place the thumb of his right hand on the vellum near the 5th string, arch the hand over the strings and glide the first or second finger lightly "to and fro" across the strings.

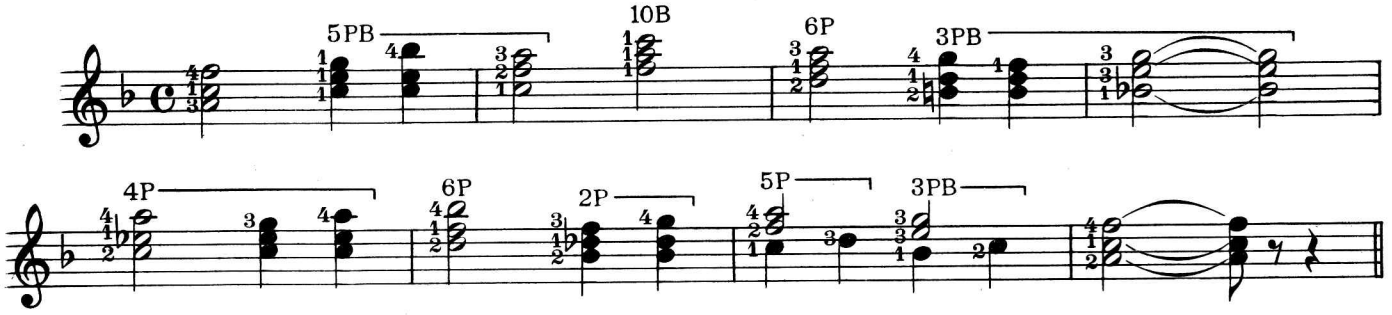
MELODY TREMOLO
with thumb accompaniment

Place the tip of the 3rd finger of the right hand on the vellum below the strings and tremolo the melody on the first string while playing the accompanying notes with the thumb.

BRUSHING THE STRINGS

This effect is obtained by resting the right arm four or five inches above the wrist on the rim of the banjo about four inches from the tail-piece, and brushing the strings lightly with the first or second finger. The palm of the hand should be flat against the strings.

The exercise below combines the three effects.



Tremolo melody with thumb accompaniment

THE DANCING BEAR

This piece comes to my mind as many years ago I used to see a man with a performing bear in the streets. The man used to play a tune similar to this on a reed instrument and the bear used to dance. The bear would lie down where the *rallentandos* are marked and commence dancing again where *a tempo* is marked and then pretend to die at the end of the piece.
